Lorenzo **ROSSI**

About Me

Computer Science and Engineering student.
Technology and programming enthusiast.
Creative project developer.

▢ Milano, Italy

Personal information

Birth Date: **01/02/1997**
Citizenship: **Italian**
Languages: **English** (C1) **French** (B1) **Italian** (native)

Programming Languages

Proficient: C, JavaScript, Go, Python, Processing, GDscript
Experienced: VHDL, SQL, Assembly, Java, Bash, Haskell, Scheme, Erlang
Familiar: Matlab, C++, Rust

Descriptive Languages

CSS, HTML5, LaTeX

Hobbies

- Photography
- Photo Editing
- Film Lover

Experience

Freelancing on web platforms   **October 2020 - Current**
• Areas of expertise: Web Development (*front-end and back-end*), Embedded Systems, Software Development.
• Engaged and completed multiple projects involving both embedded (*using ESP32, Arduino and RaspberryPi*) and desktop (*on both Linux and Windows*) systems.
• Gained important soft skills like dealing with a vast amount of work and collaborating with people all over the world.
• Got the chance to interface with the real world outside my university and interact with real life projects.

Personal Projects

Embedded developer   Arduino | ESP32 | ESP8266 | PIC
• Experience in developing embedded systems using microcontrollers.
• Development of IoT system for real word data measurements.
• Creation of web interfaces to display data.

Full Stack developer   JavaScript | Python | HTML5 | CSS
• Development of websites from back to front-end, including data analysis and visualizations, and interactive web programs.
• Foundations of web design and creation of user-friendly interfaces.
• Integration of web services with serverless platforms like AWS Lambda.

Visual Arts and Games Developer JavaScript | Python | Processing | Godot
• Creation of interactive or fully automated digital art projects.
• Application of creative coding oriented to make visually appealing videos and images.
• Creation of 2D games using Godot Engine, from game design to programming.

General Software Developer   Python | JavaScript | Go | C
• Development of software applications for various purposes, including web scraping, data analysis, visualizations, and computationally-heavy problem-solving.
• Participation in multiple online coding challenges, such as Advent of Code, Codewars, Leetcode, and Challenges provided by Reply.

Deep Learning Developer   Python | TensorFlow | Keras
• Development of deep learning models for image classification, object detection, and image segmentation.
• Development of deep learning models for real-world problems.
• Development of models for real time image processing.

Booklet Creator   Adobe InDesign | Adobe Photoshop | Adobe Lightroom
• Creation of booklets for personal projects.
• Use of specialized software for image editing, image development, and page layout creation.

Education

IIS Luigi Galvani, Milano   **2011 - 2016**
• High School Diploma in Electromedical Installations.

Politecnico di Milano   **2016 - 2021**
• Bachelor of Science in Electronic Engineering.

Politecnico di Milano   **2021 - Current**
• Master of Science in Computer Science and Engineering.
